## CALCULATING THE AMOUNT OF MOULDINGS

For mouldings: measure the perimeter of the room and add 10% to cover waste from cutting the corners.

For chair-rails and baseboards: measure the perimeter of the room less the width of any openings such as doors and windows. In that case, add 5% for waste.

# USEFUL TIPS

## ACCLIMATISATION

To avoid expansion or shrinkage of the mouldings due to variations in temperature and humidity, it is essential to leave them in the room you plan to install them for 24 hours prior to installation. Be sure, also, to avoid subjecting them to excessive variations in temperature between storage and installation, and to maintain a constant humidity level.

## JOINT ADHESIVE ADEFIX® PLUS

For coving edges and joints of WALLSTYL® and ARSTYL® products with a height or projection equal to or greater than 10 cm as well as for all indirect lightning solutions, we strongly recommend to use the joint adhesive ADEFIX® PLUS.

## INDIRECT LIGHTING SOLUTIONS

In order to prevent light transmission and obtain a better reflection, use the aluminized adhesive tape »NMC reflexion band« inside the mouldings before installing them.
